evaluated at the exact cluster centers
$\theta = 0$; multiplicity 2
Normalized singular value s_k/L
10^{-1}
10^{-2}
10^{1}
10^{2}
Initial states per side $L = R$
s_1/L: target-cluster signal
s_2/L: target-cluster signal
s_3/L: other-cluster residual
s_4/L: sampling noise
$L^{-1/2}$ sampling-noise slope guide
evaluated at the exact cluster centers
$\theta = 0.02$; multiplicity 1
Normalized singular value s_k/L
10^{1}
10^{2}
Initial states per side $L = R$
s_1/L: target-cluster signal
s_2/L: other-cluster residual
s_3/L: other-cluster residual
s_4/L: sampling noise
$L^{-1/2}$ sampling-noise slope guide
